

Rahmen-Ausstellfenster mit Verdunkelungssystem & Insektenschutz
**31855 / 31857 / 31858 / 31859 / 318580 / 318581 / 318582 /
 31868 / 31869**

01

Schritt 1: Die Wandstärke muss zwischen 26-47 mm liegen.

02

Schritt 2: Tragen Sie Silikon- oder Schaumstoff rund um die Fensterkante auf und montieren Sie das Fenster.

03

Schritt 3: Befestigen Sie den Winkel (L-Form) auf jedem Gewinde und schrauben Sie dann die Sechskantmutter, stellen Sie sicher, dass Sie diese nicht zu fest ziehen.

04

Schritt 4: Setzen Sie in die Blindbohrungen die Sechskantmuttern.

05

Schritt 5: Drehen Sie die Schrauben in die Blindbohrungen (nicht zu fest ziehen).

06

Schritt 6: Bedecken Sie die Schrauben mit Abdeckkappen.

Hængslet vindue med mørk persienne og fluenet

**31855 / 31857 / 31858 / 31859 / 318580 / 318581 / 318582 /
31868 / 31869**

01

Trin 1: Tykkelsen på væggen, hvor vinduet skal installeres skal være mellem 26-47 mm.

02

Trin 2: Påfør silikone eller skum rundt langs vinduets kant, og placér vinduet i væggen.

03

Trin 3: Fastgør et hjørnebeslag (L-formet) på hvert gevind, og skru sekskantskruen i uden at stramme den for meget.

04

Trin 4: Montér persiennekanterne i persiennehullerne med sekskantskruer.

05

Trin 5: Sæt skruer i persienerne (stram dem ikke for meget).

06

Trin 6: Påfør dækslerne til at dække skruenhullerne med.

Hinged window with darkening blind & fly screen

**31855 / 31857 / 31858 / 31859 / 318580 / 318581 / 318582 /
31868 / 31869**

01

Step 1: The wall thickness for window be installed must be between 26-47 mm.

02

Step 2: Apply silicone or foam type around window edge and then fit window onto wall.

03

Step 3: Fit angle (L shape) bracket on every thread and then screw the Hex-head nut, make sure do not over tighten.

04

Step 4: Fit blind lining up blind holes with Hex-head nut.

05

Step 5: Apply screws to blinds (do not over tighten).

06

Step 6: Apply caps to cover screws holes.

Ventana con bisagra con persiana y mosquitera

**31855 / 31857 / 31858 / 31859 / 318580 / 318581 / 318582 /
31868 / 31869**

01

Paso 1: El grosor de pared para la ventana que se va a instalar debe ser entre 26-47 mm.

02

Paso 2: Aplique silicona o un tipo de espuma alrededor del borde de la ventanay después ajuste la ventana a la pared.

03

Paso 3: Ajuste la escuadra (forma en L) en cada rosca y después enrosque la tuerca hexagonal sin apretar demasiado.

04

Paso 4: Ajuste la persiana alineando sus orificios con la tuerca hexagonal.

05

Paso 5: Aplique los tornillos a las persianas (no apriete demasiado).

06

Paso 6: Aplique los tapones para cubrir los orificios de los tornillos.

Saranoitu ikkuna pimennysverholla & hyttysverkolla

**31855 / 31857 / 31858 / 31859 / 318580 / 318581 / 318582 /
31868 / 31869**

01

1: Seinän paksuus, jolle ikkuna asennetaan, on oltava 26-47 mm.

02

Vaihe 2: Levitä silikonitai vaahtomuovia ikkunareunan ympäri ja asenna sitten ikkuna seinään.

03

Vaihe 3: Asenna kulmasulk (L-muoto) jokaiseen kierteeseen ja sitten ruuvaa Hex-päämutteri, varmista ettet kiristä liikaa.

04

Vaihe 4: Asenna verhon vuori verhoreikiin Hex-päämutterilla.

05

Vaihe 5: Asenna verhoihin ruuvit (älä kiristä liikaa).

06

Vaihe 6: Asenna paikolleen suojat peittääkseen ruuvien reiät.

Fenêtre à charnière avec store assombrissant et anti-insectes

31855 / 31857 / 31858 / 31859 / 318580 / 318581 / 318582 / 31868 / 31869

01

Étape 1 : l'épaisseur de la paroi pour installer la fenêtre doit être entre 26 et 47 mm.

02

Étape 2 : appliquez du silicone ou de la mousse autour du bord de la fenêtre, puis intégrez la fenêtre au mur.

03

Étape 3 : Ajustez le profil de l'angle (forme L) à chaque coin et vissez l'écrou hexagonal, assurez-vous de ne pas trop serrer.

04

Étape 4 : Ajustez les trous avec les écrous hexagonaux.

05

Étape 5 : Appliquez les vis sur les stores (sans trop serrer).

06

Étape 6 : Appliquez les capuchons pour couvrir les pas de vis.

Finestra incernierata con scuri avvolgibili e zanzariera

**31855 / 31857 / 31858 / 31859 / 318580 / 318581 / 318582 /
31868 / 31869**

Passo 1: Per installare la finestra, lo spessore della parete deve essere compreso tra 26 e 47 mm.

Passo 2: Applicare silicone o schiuma sigillante intorno al bordo della finestra e, quindi, fissare la finestra alla parete.

Passo 3: Posizionare una staffa angolata (a forma di L) su ogni filettatura e, quindi, avvitare il dado a testa esagonale, assicurandosi di non stringerlo troppo.

Passo 4: Posizionare lo scuro avvolgibile allineandone i fori con il dado a testa esagonale.

Passo 5: Avvitare le viti agli scuri (senza stringere troppo)

Passo 6: Mettere i tappini per coprire i fori delle viti.

Scharnierend raam met verduisteringsrolgordijn & vliegenscherm
**31855 / 31857 / 31858 / 31859 / 318580 / 318581 / 318582 /
 31868 / 31869**

01

Stap 1: De dikte van de muur waar het raam in geplaatst wordt moet tussen 26-47 mm zijn.

02

Stap 2: Breng siliconen of schuim aan om randen raamen monteer het raam dan in de muur.

03

Stap 3: Monteer (L-vormige) hoeksteun op elke draad en dan de Zeskantmoer vastschroeven, niet te vast aandraaien.

04

Stap 4: Monteer rolgordijn waarbij de blinde gaten uitgelijnd zijn met de zeskantmoer.

05

Stap 5: Plaats schroeven op rolgordijn (niet te vast aandraaien).

06

Stap 6: Plaats kapjes om schroefgaten te bedekken.

Hengslet vindu med lystette persienner & myggnetting

**31855 / 31857 / 31858 / 31859 / 318580 / 318581 / 318582 /
31868 / 31869**

01

Trinn 1: Veggetykkelse for vindu installasjon må være mellom 26-47 mm.

02

Trinn 2: Bruk silikon eller skumtype rundt vinduets kant og monter så vinduet i veggen.

03

Trinn 3: Plasser vinkel (L formet) brakett på hvert feste og skru inn den seksantete mutteren, sørg for å ikke stramm den for mye.

04

Trinn 4: Tilpass så persienne stemmer overens med persiennens hull med den seksantete mutteren.

05

Trinn 5: Skru inn skruene på persienne (ikke stramm for mye)

06

Trinn 6: Fest hettene på for å dekke skruehullene.

Gångjärnsförsett fönster med mörkläggningsjalusi och flugskärm

31855 / 31857 / 31858 / 31859 / 318580 / 318581 / 318582 / 31868 / 31869

01

Steg 1: Väggtjocklek för fönster som ska monteras måste vara mellan 26-47 mm.

02

Steg 2: Applicera silikon eller skum runt fönsterkanten och montera sedan fönstret på väggen.

03

Steg 3: Montera vinkel (L-form)-konsol på varje tråd och skruva sedan i den hexagonala muttern, skruva inte åt för mycket.

04

Steg 4: Montera jalusi, gör upp jalusihål med hexagonal mutter

05

Steg 5: Skruva fast jalusierna (dra inte åt för hårt).

06

Steg 6: Montera hatt för att täcka över skruvhål.
